MARCO DE REFERENCIA INSTITUCIONAL PARA EL EJERCICIO

- El Grupo Intergubernamental de Coordinación del Sistema de Alerta contra los Tsunamis y otras Amenazas Costeras en el Caribe y Regiones Adyacentes (**ICG/CARIBE EWS**)
- La Agencia de Manejo de Emergencias y Desastres del Caribe (**CDEMA**)
- El Centro de Coordinación para la Prevención de los Desastres Naturales en América Central (**CEPREDENAC**)
- El US NWS National Tsunami Hazard Mitigation Program (**NTHMP**) y Programa de Alerta de Tsunamis del Caribe (**CTWP**)

CARIBE WAVE 2011

- 34 países y territorios* participaron en el primer ejercicio regional de tsunamis, CARIBE WAVE 2011 que tuvo lugar el 23 de Marzo de 2011. Esto representó un tasa de participación de casi 90% de las jurisdicciones que han nominado Puntos Focales de Alerta y Contactos Nacionales y un 75% de todos los países y territorios de la región CARIBE EWS.

* Aruba, Antigua and Barbuda, Bahamas, Barbados, Belize, Bolivarian Republic of Venezuela, Colombia, Dominica, Dominican Republic, France (Martinique, Guadeloupe, St Martin), Grenada, Guatemala, Haiti, Honduras, Jamaica, Mexico, Netherlands (Curacao, Sint Maarten and Sint Eustatius), Nicaragua, Panama, Peru, Saint Lucia, Saint Vincent and the Grenadines, Trinidad and Tobago, United Kingdom (Anguilla, British Virgin Islands, Bermuda, Cayman Islands, Turks and Caicos), Estados Unidos (Puerto Rico y US Virgin Islands).

Lecciones de CARIBE WAVE 2011

- Confusión con los términos de alerta utilizados (traducción y diferencia entre los productos de PTWC and WCATWC)
- Deseo de tener mayores detalles sobre el impacto
- Deseo de tener los tiempos estimados de arribo para todos los puntos de pronóstico del CARIBE EWS, ir respectivo del impacto.
- Webinars fueron útiles.
- También fueron muy útiles los emails que fueron enviados a los que se suscribieron durante el transcurso del ejercicio.
- Se necesita identificar alternativas a nivel local para la recepción y diseminación de los mensajes.
- Mejorar el cuestionario de evaluación.

- Un 100% de los países, a pesar de los problemas de comunicación, indicaron que el ejercicio fue muy **útil para validar y enfatizar la necesidad de planes de tsunamis**. Hay una necesidad absoluta para **reforzar los planes de preparación y desalojo** e involucrar al sector privado. El hecho que la **población y la prensa** tenían tanto interés en el ejercicio fue también importante.

Otras Justificaciones para Ejercicio 2013

- Con cada ejercicio aumenta la participación (experiencia de Puerto Rico e IIVV)
- La cantidad e impacto de eventos recientes: Haití, Chile and Japón;
- Vulnerabilidad de tsunamis en nuestra región
- Oportunidades para cooperación con otras organizaciones
- Importancia de poner a prueba y evaluar el sistema.

Los datos de tsunamis históricos indican que en los últimos 500 años se han observado en el Caribe más de 75 tsunamis, y aunque ocurren con menos frecuencia que en otras cuencas oceánicas, tienen el potencial de matar unas 500,000 en pocas horas si no se responde adecuadamente..

CARIBE WAVE/LANTEX 2013

Objetivos

- **Ejercitar y evaluar las operaciones del sistema de alerta de tsunamis, el CARIBE EWS, en particular**
 - Validar la **emisión** de los productos de tsunami del PTWC y WCATWC
 - Validar la **recepción y diseminación** de los productos de tsunami en los puntos focales de alerta del CARIBE EWS (TWFP).
- **Comenzar con un proceso de exposición a los productos experimentales del PTWC .**
 - Revisar y evaluar los productos experimentales del PTWC que estarán disponible como parte del ejercicio
 - Proveer comentarios sobre la puesta en escena, formato y contenido de los productos experimentales

Objetivos (cont)

- **Validar el alistamiento para responder a un tsunami local/regional**
 - Validar el alistamiento operacional del Punto Focal de Alerta y/o la Oficina Nacional/Estatal de Manejo de Emergencias.
 - Mejorar el alistamiento operacional. Antes del ejercicio asegurar que las herramientas y planes adecuados hayan sido desarrollados, incluyendo materiales educativos.
 - Validar que la diseminación de alertas, información y sugerencias de los Puntos Focales de Alerta a agencias relevantes sea oportuna y precisa
 - Validar el proceso organizacional de toma de decisiones (planes de respuesta de emergencia) sobre alertas públicas y desalojos.
 - Validar que los métodos usados para notificar e instruir el público sean oportunos y precisos.

Metas

- Participación del 85% de los estados miembros del ICG CARIBE EWS (75% participaron en 2011)
- Cumplimiento con el cronograma
- 75 % de los Estados Miembros involucrar la comunidad (61% tuvieron actividades con la comunidad en el 2011)
- 100% reciban el mensaje Dummy por los medios oficiales de comunicación (90% lo recibieron en el 2011)
- 100% de los países contesten el cuestionario de evaluación (94% en 2011)

Appendix E. WCATWC Exercise Messages

The following messages, created for the CARIBE WAVE 13/LANTEX 13 tsunami exercise, are representative of the official standard products issued by the WCATWC during a large magnitude 8.5 earthquake and tsunami originating 57 miles north of Oranjestad, Aruba in the Caribbean Sea at 13.35°N, 69.95°W. During a real event, the TWCs would also issue graphical and html-based products to their web sites and via RSS. Forecasts are only provided for points where the WCATWC has high resolution digital elevation models. EARTHQUAKES OF THIS SIZE HAVE THE POTENTIAL TO GENERATE A
WIDESPREAD DESTRUCTIVE TSUNAMI THAT CAN AFFECT COASTLINES ACROSS
THE ENTIRE CARIBBEAN REGION.

HOWEVER - IT IS NOT KNOWN THAT A TSUNAMI WAS GENERATED. THIS
WATCH IS BASED ONLY ON THE EARTHQUAKE EVALUATION. AUTHORITIES IN
THE REGION SHOULD TAKE APPROPRIATE ACTION IN RESPONSE TO THE
POSSIBILITY OF A WIDESPREAD DESTRUCTIVE TSUNAMI.

ESTIMATED INITIAL TSUNAMI WAVE ARRIVAL TIMES AT FORECAST POINTS
WITHIN THE WARNING AND WATCH AREAS ARE GIVEN BELOW. ACTUAL
ARRIVAL TIMES MAY DIFFER AND THE INITIAL WAVE MAY NOT BE THE
LARGEST. A TSUNAMI IS A SERIES OF WAVES AND THE TIME BETWEEN
SUCCESSIVE WAVES CAN BE FIVE MINUTES TO ONE HOUR.

EVALUATION

A SIGNIFICANT TSUNAMI WAS GENERATED BY THIS EARTHQUAKE.
SEA LEVEL READINGS NOW INDICATE THAT THE THREAT IS DIMINISHING
IN MOST AREAS. THEREFORE THE TSUNAMI WATCH ISSUED BY THIS CENTER
IS NOW CANCELLED.

FOR ANY AFFECTED AREAS - WHEN NO MAJOR WAVES HAVE OCCURRED FOR AT
LEAST TWO HOURS AFTER THE ESTIMATED ARRIVAL TIME OR DAMAGING WAVES
HAVE NOT OCCURRED FOR AT LEAST TWO HOURS THEN LOCAL AUTHORITIES
CAN ASSUME THE THREAT IS PASSED. DANGER TO BOATS AND COASTAL
STRUCTURES CAN CONTINUE FOR SEVERAL HOURS DUE TO RAPID CURRENTS.
AS LOCAL CONDITIONS CAN CAUSE A WIDE VARIATION IN TSUNAMI WAVE
ACTION THE ALL CLEAR DETERMINATION MUST BE MADE BY LOCAL
AUTHITIES.

THIS WILL BE THE FINAL PRODUCT ISSUED BY THE PACIFIC TSUNAMI
WARNING CENTER FOR THIS EVENT UNLESS ADDITIONAL INFORMATION
BECOMES AVAILABLE.

Participación de los Estados Miembros

- Cada Estado Miembro debe establecer su propio grupo de trabajo nacional para decidir la envergadura de la participación y pruebas de comunicación.

MEDIOS DE COMUNICACIÓN

- Apendice H del Manual incluye un ejemplo de un comunicado de prensa
- La NOAA y UNESCO difundirán un **comunicado de prensa** varios días antes del Ejercicio a fin de describirlo y explicar su finalidad.
- **Guías para los medios** de tsunamis han sido preparados por la Red Sísmica de Puerto Rico (<http://www.prsn.uprm.edu/mediakit/>), y el Seismic Research Unit (<http://www.uwiseismic.com>).
- Si se van a emitir mensajes publicos el dia del ejercicio es muy importante **orientar a la población antes para evitar falsas alarmas.**
